Subject Index—Volumes 418-429

A

- ABJS Presidential Lecture, June 2004, our orthopaedic heritage: American Civil War, **429:306**
- Acetabular bone loss, severe, during revision hip arthroplasty, modular porous metal augments for treatment of, **429:201**
- Acetabular components, late loosening of, **418:172**
- Acetabular cup positioning, with use of imageless navigation system, **426:159**
- Acetabular fracture, animal model of, **423:64**
- Acetabular labral tears, rarely occur in absence of bony abnormalities, **426:145**
- Acetabular labrum, in femoroacetabular impingement, histopathologic features of, **429:262**
- Acetabular liner, constrained tripolar, for treating intraoperative instability and postoperative dislocation after THA, **429:117**
- Acetabular osteoarticular allograft, after Ewing's sarcoma resection, **419:149**
- Acetabular osteotomy, **429:182**
- Acetabular revision
 antiprotusio cages for, **420:106**
 surgery, structural allografts in, **420:113**
- Acetabular version, in radiographic presentation of hip dysplasia, **418:48**
- Acetabulum, treatment of advanced metastatic lesions of, using saddle prosthesis, **426:23**
- Achilles allograft, anterior cruciate ligament reconstruction with, **421:273**
- Achilles tendon(s)
 degenerative, expression of VEGFR-1 and VEGFR-2 in, **420:286**
 repair, open, wound complications after, **427:63**
 ruptures, in ochronosis, **424:180**
- Acute compartment syndrome, of thigh and relation to associated injuries, **425:223**
- Acute effects, of cartilage impact, **423:33**
- Acute hip fracture, vitamin D status and bone turnover in women with, **422:208**
- Acute knee dislocations, and their complications, **422:135**
- Adolescent(s). *See also* Child(ren)
 allograft about knee in, with high-grade sarcoma, **421:232**
 knee pain, **425:284**
 lesion of right proximal tibia, **418:266**
 lower leg pain, **418:279**
 painless ankle mass, **422:263**
 slipped capital femoral epiphysis, with sickle cell disease, **419:198**
- Advances in surgery and molecular medicine, **422:2** (editorial)
- Agility Total Ankle, support for fibular plating of, **424:118**
- Agility total ankle arthroplasty, joint contact characteristics in, **424:125**
- Agility® total ankle replacement system, on peri-ankle ligaments, **424:137**
- Alendronate, uncouples osteoclast and osteoblast function, **425:135**
- Alignment, influences wear in knee after medial unicompartmental arthroplasty, **423:161**
- Allograft(s)
 about knee in young patients with high-grade sarcoma, **421:232**
 cryopreserved, anterior cruciate ligament reconstruction in cryopreserved allografts, **420:268**
 impactions of, for femoral component revision, **420:160**
 informed consent, not routinely documented for procedures using, **423:287**
 mini-pig fresh osteochondral, **427:226**
 osteoarticular, for proximal humeral bone tumors, cement in, **427:190**
 structural, in acetabular revision surgery, **420:113**
 tibia segmental, provide alternative in reconstructing tumor resections, intercalary femur and, **426:97**
- American medical education, development of, from turn of century to era of managed care, **422:256**
- Amputation
 forequarter, technique of, **423:191**
 segmental, for recurrent malignant bone tumors of distal femur, **426:239**
- Amstutz, Harlan C., **420:2**
- Anatomic consideration, of nerve supply to vastus medialis in knee surgery, **423:157**
- Anatomic hip prosthesis, seven to 10 years followup of, **423:129**
- Aneurysmal bone cysts, in children, surgical treatment and recurrence rate of, **421:205**
- Ankle
 arthroplasty(ies)
 generate wear particles similar to knee arthroplasties, **424:69**
 with preoperative coronal plane deformity, **424:98**
 and design of total ankle replacement, mobility of, **424:39**
 fusion, takedown of, and conversion to total ankle replacement, **424:80**
 HINTEGRA: rationale and short-term results of 122 consecutive ankles, **424:57**
 instability, chronic lateral, midterm results of modified Evans repair for, **422:180**
 joint, artificial, **424:3** (classic article)
 mass, painless, in 12-year-old boy, **422:263**
 range of motion, after total ankle arthroplasty, accurate measurement of, **424:27**
 replacement (editorial), **424:2**
- Ankylosing spondylitis, spine complicating, fractures and dislocations of, **422:129**
- Anterior cruciate ligament
 injuries, neuromuscular dynamic restraint in women with, **425:189**
 reconstruction
 bioabsorbable expansion bolt fixation in, **418:225**
 in cryopreserved allografts, **420:268**
 cryotherapy after, **421:268**
 magnetic resonance evaluation in, **419:202**
 reconstruction,
 with Achilles allograft, **421:273**
 leiomyosarcoma of distal femur after, **419:214**
 reduction of initial tension in, **419:207**
- Anterior shoulder instability, modifies glenoid subchondral bone density, **423:259**
- Anteroposterior axis, of tibia for total knee arthroplasty, **420:213**

- Antibiotic-loaded bone cement, for treatment of infected joint replacements, practical applications of, **427:79**
- Antibiotic prophylaxis, in hip fracture surgery, **419:179**
- Antimicrobial properties, porcine small intestine submucosa does not show, **427:18**
- Antiprotusio cages, for acetabular revision, **420:106**
- Apoptosis, bisphosphonates may reduce recurrence in giant cell tumor by inducing, **426:103**
- Arm velocity on scapular motion, **419:316** (letter), **419:317** (reply to letter)
- Arthritis
hips, follow-up of valgus osteotomy for, **426:151**
posttraumatic, incongruity *versus* instability in etiology of, **423:44**
septic, with juvenile rheumatoid arthritis, **418:219**
- Arthropathy, shoulder, hemophilic, retrospective radiographic review of, **423:106**
- Arthroplasty(ies)
hip, evaluation complications and results of, **427:52**
loose, protease expression in interface tissues around, **425:230**
- Arthroscopic meniscal repair, **421:175**
- Articular cartilage
development, and degeneration, **427S:69**
in intra-articular fractures in rabbits, healing of, **423:3** (classic article)
single impact load tolerance of, **426:266**
- Articular chondrocyte metabolism, pressure and shear differentially alter, **427S:89**
- Articular defects, remodeling of, in animal model, **423:59**
- Articular displacement, assessment, of distal radius fractures, **423:79**
- Articular fracture(s)
assessing, cartilage contact stress after, **423:52**
current principles of treatment in clinical practice of, **423:27**
- Articular geometry, on prosthetic wrist stability, **421:134**
- Articular impaction, long-term effects of, **423:40**
- Articular injury, quantifying comminution as measurement of severity of, **423:74**
- Articulating antibiotics, treatment of total hip and knee infection with, **427:37**
- Artificial ankle joint, **424:3** (classic article)
- Aspirin therapy, and bleeding during proximal femoral fracture surgery, **418:205**
- Asymptomatic osteonecrosis, **429:124**
- Asymptomatic patients, restricted femoral nail removal in, **423:222**
- Atrophic nonunion, in rabbit, feasibility of percutaneous gene transfer to, **425:237**
- Atypical slipped capital femoral epiphysis, after radiotherapy and chemotherapy, **426:212**
- Autologous donation, epoetin alfa reduces blood transfusions compared with, **423:240**
- Avascular necrosis, of femoral head, femoral osteotomies for, **418:34**
- Axis, structural properties of, in cadavers, **418:134**
- B**
- Bacterial DNA, in total hip arthroplasties, polymerase chain reaction can detect, **427:132**
- Bearing surfaces, alternative, biologic and tribologic considerations, **418:98**
- Bernese periacetabular osteotomy, total hip arthroplasty after, **423:118**
- Bioabsorbable expansion bolt fixation, in anterior cruciate ligament reconstruction, **418:225**
- Biodegradable antibiotic delivery system, efficacy of hydroxyapatite composite as, **424:244**
- Biodegradable microspheres, treatment of osteomyelitis with, **421:293**
- Biomaterial-centered infection, microbial adhesion *versus* tissue integration, **427:4** (classic article)
- Biomechanical considerations, of fracture treatment and bone quality maintenance in elderly with osteoporosis, **425:12**
- biomechanics, and inflammation role, in cartilage injury and repair, **423:17**
- Biomechanics
of large femoral heads: what they do and don't do, **429:102**
- Biopsy
gamma probe assisted, of suspected metastatic rib lesions, **422:186**
site, remote, metastasis of osteosarcoma to, **424:216**
- Bioreabsorbable calcium phosphate delivery system, with teicoplanin for MRSA osteomyelitis, **423:253**
- Bipartite patella, traumatic separation of, **420:257**
- Bipolar cup, with self-centering system, disassembly of, **425:163**
- Bipolar hemiarthroplasty
outcome of, and hydroxyapatite, **421:143**
versus THA for osteonecrosis of femoral head, **424:161**
- Bisphosphonates, may reduce recurrence in giant cell tumor by inducing apoptosis, **426:103**
- Bladder exstrophy, distraction osteogenesis (callotaxis) in, **418:231**
- Blast injury research, **422:97**
- Blastomycosis, of long bones, **421:255**
- Blast phenomena, terrorism and, **422:82**
- Bleeding, aspirin therapy and, **418:205**
- Blood
flow, intraarticular pressure reduces, to femoral head, **424:149**
management, after bilateral total knee arthroplasties, **422:274** (letter), **422:274** (reply)
replacement, and fluid resuscitation in patients with polytrauma, **422:37**
transfusions, epoetin alfa reduces, compared with autologous donation, **423:240**
- Blunt polytrauma, initial care of patient with, **422:30**
- Bone, Lawrence B., **422:11** (classic article)
- Bone(s)
anatomy, and rotational alignment in total knee arthroplasty, **422:270** (letter), **422:270** (reply)
- blood flow
measurements, fluorescent microspheres for, **427:241**
microspheres accurately predict, **424:253**
- cement, depot local anesthetic in, **418:242**
- cysts
calcaneal, clinical relevance of, **424:202**
unicameral, treatment of, by curettage and packing with plaster-of-Paris pellets, **422:145**
- deformity, pediatric, smart intramedullary rod for correction of, **424:194**
- fracture(s)
healing, metabolic measurement techniques to assess, **424:231**
long, in polytrauma, pulmonary aspects of, **422:66**
on gene expression in cancer cells, influence of contact with, **426:54**

- and joint infections, chronic, with oral linezolid, treatment of, **427:67**
- long, blastomycosis of, **421:255**
- loss
- considerable, femoral fixation in face of, **429:215**
 - considerable, use of modular stems, femoral fixation in face of, **429:236**
 - postmenopausal, at distal radius in older Chinese women, ultrasound on prevention of, **427:234**
- marrow transplantation, in patient with fibrodysplasia, **422:277** (letter), **422:278** (reply)
- quality maintenance in elderly with osteoporosis, biomechanical considerations of fracture treatment and, **425:12**
- repair, tissue engineered, molecular regulation of osteoblasts for, **427:220**
- surrounding, glenoid cement may endanger, **419:76**
- tumors
- malignant, recurrent, of distal femur, segmental amputation for, **426:239**
 - proximal humeral, cement in osteoarticular allografts for, **427:190**
 - turnover and vitamin D status in women with acute hip fracture, **422:208**
- Bony abnormalities, acetabular labral tears, rarely occur in absence of, **426:145**
- ### C
- Cadaveric specimens, structural properties of axis in, **418:134**
- Calcaneal bone cysts, clinical relevance of, **424:202**
- Calcaneal fractures, relative to treatment options, **420:261**
- Calcaneus, insufficiency fracture of body of, in elderly with osteoporosis, **422:190**
- Calcium phosphate coating, on porous-coated femoral stem, **424:153**
- Calf muscle, venous malformation, toe-walking from, **420:225**
- Cam impingement, abnormal extension of femoral head as cause of, **418:54**
- Cancer
- cells, influence by contact with bone cells in novel coculture system that models bone metastasis, gene expression in, **426:54**
 - gastric, skeletal metastasis in patients with, **423:208**
 - treatment, connective tissue, long-term effects of, **426:74**
- Canine ovariectomy and orchiectomy, and prevalence of ACL injury, **429:301**
- Carcinoma, tricholemmal, skeletal metastasis in, **423:213**
- Carpal tunnel syndrome, acute, dose-responsiveness of electrophysiological change in, **427:120**
- Cartilage
- collagens, **427S:118**
 - contact stress, after articular fracture, assessing, **423:52**
 - degeneration, and regeneration, **427S:26** (breakout session II)
 - degradation, chemokines in, **427S:53**
 - development, and degeneration, **427S:69**
 - impact, acute effects of, **423:33**
 - injury, and repair, role of biomechanics and inflammation in, **423:17**
 - matrix degeneration in osteoarthritis, role of cytokines, **427S:27**
 - repair, hyaluronic acid on rabbit model of, **424:266**
 - repair in knee, magnetic resonance imaging appearance of, **422:214**
 - tolerates single impact loads of half the joint fracture threshold, **426:266**
- Casualties, mass civilian, overseas, planning for, **422:109**
- CD44 and hyaluronon, **427S:152**
- Cement
- acrylic bone
 - alternative materials to, for delivery of depot antibiotics in orthopaedic infections, **427:101**
 - glycine filler on elution rate of gentamicin from, **427:25**
 - antibiotic-loaded bone, for treatment of infected joint replacements, practical applications of, **427:79**
 - contained proximal tibia defect, pins in, **419:232**
 - femoral stem, durability of, patients 60 to 80 years old, **419:115**
 - in osteoarticular allografts for proximal humeral bone tumors, **427:190**
 - spacers, high-dose antibiotic-loaded, after resection of infected total knee arthroplasty, systemic safety of, **427:47**
- Cementless
- acetabular reconstruction, in revision total hip arthroplasty, **420:96**
 - mobile-bearing total ankle replacements, twenty-year evaluation of, **424:19**
- Ceramics, in THA, concerns about, **429:73**
- Chamley-Kerboull hip arthroplasty, in patients younger than 50 years, **418:112**
- Chemokines, in cartilage degradation, **427S:53**
- Chemotherapy
- and radiotherapy, atypical slipped capital femoral epiphysis after, **426:212**
 - synovial sarcoma after, for osteosarcoma, **418:198**
- Chest wall, chondrosarcoma of, **427:184**
- Chiari osteotomy, and hip shelf arthroplasty, in adults, long-term survivorship of, **418:81**
- Childbirth, after periacetabular osteotomy, **418:146**
- Child(ren). *See also* Adolescent(s)
- allograft about knee in, with high-grade sarcoma, **421:232**
 - aneurysmal bone cysts, surgical treatment and recurrence rate of, **421:205**
 - bone deformity, smart intramedullary rod for correction of, **424:194**
 - early loss of hip containment and dysplasia epiphysealis hemimelica, **427:213**
- elbow
- mass, **418:272**
 - soft tissue mass, **427:258**
- hip pain, **419:311**
- juvenile rheumatoid arthritis, septic arthritis in patient with, **418:219**
- knee pain, **425:284**
- lesion of right proximal tibia, **418:266**
- lower leg pain, **418:279**
- osteosarcoma, **421:212**
- painless ankle mass, **422:263**
- slipped capital femoral epiphysis, with sickle cell disease, **419:198**
- smart intramedullary rod for correction of bone deformity, **424:194**
- sternal pain, **421:300**
- submuscular bridge plating, for complex pediatric femur fractures, advantages of, **426:244**
- thigh
- mass, **421:300**, **426:274**
- Chondrocyte function, by proinflammatory mediators, regulation of, **427S:37**

- Chondrocyte matrix genes, and products by electric fields, up-regulation of, **427S:163**
- Chondrocyte senescence, joint loading and osteoarthritis, **427S:96**
- Chondrosarcoma
of chest wall, **427:184**
of hand, **424:211**
- Chondrosarcoma malignancy, telomerase reverse transcriptase subunit expression with, **426:117**
- Chondrocyte signaling and osteoarthritis, protein kinases in, **427S:145**
- Chronic bone and joint infections, treatment of, with oral linezolid, **427:67**
- Chronic lateral ankle instability, midterm results of modified Evans repair for, **422:180**
- Clinical and radiographic assessment, of young adult with hip dysplasia, **418:18**
- Clinical pathway, for hip fractures in elderly, **425:72**
- Cobalt-chrome, and titanium cementless femoral stems of identical shape produce equal results, **427:148**
- Collagens, and cartilage matrix homeostasis, **427S:118**
- Complex genetic disease, dissection of, **419:297**
- Complex pediatric femur fractures, advantages of submuscular bridge plating for, **426:244**
- Complications
and litigation, **420:319**
rates, of revision total knee arthroplasty, in northern Illinois, **429:279**
and results of arthroplasty for salvage of failed treatment of malignant pathologic fractures of hip, **427:52**
wound, after open Achilles tendon repair, **427:63**
- Component removal, in revision total hip arthroplasty, **420:48**
- Computed tomography
to assess pelvic lysis after total hip replacement, **422:167**
-based orthopaedic navigation, **421:77**
- Computer-assisted cup placement techniques, in total hip arthroplasty improve accuracy of placement, **426:174**
- Computer-assisted surgery: tumor resection, **426:219**
- Computer-guidance, in percutaneous screw stabilization of iliosacral joint, **422:201**
- Connective tissue cancer treatment, long-term effects of, **426:74**
- Constrained liners, in total hip arthroplasty, **420:122**
- Contained proximal tibia defect, pins in cementing of, **419:232**
- Coracoacromial ligament, role of, as restraint after shoulder hemiarthroplasty, **419:80**
- Core decompression
of femoral head for osteonecrosis using percutaneous multiple small-diameter drilling, **429:131**
and human bone morphogenetic protein, treatment of osteonecrosis of femoral head with, **429:139**
for osteonecrosis of hip, **418:29**
- Coronal plane deformity, preoperative, ankle arthroplasty with, **424:98**
- C-reactive protein (CRP) levels, **419:318** (letter), **419:318** (reply to letter)
- Cryopreserved allografts, anterior cruciate ligament reconstruction in cryopreserved allografts, **420:268**
- Cryotherapy, after ACL reconstruction, **421:268**
- Curative margin, concept of, **419:165**
- Curettage, and packing with plaster-of-Paris pellets, treatment of unicameral bone cysts by, **422:145**
- Current status, of material used for depot delivery of drugs, **427:72**
- Custom triflanged acetabular components, use in revision total hip arthroplasty, **429:209**
- Cusum technique, for evaluation of CT-based navigation system for total knee replacement, **425:180**
- Cysts
calcaneal bone, calcaneal, clinical relevance of, **424:202**
unicameral bone, treatment of, by curettage and packing with plaster-of-Paris pellets, **422:145**
- Cytokines
in cartilage matrix degeneration in osteoarthritis, **427S:27**
in patients with polytrauma, **422:57**
- D**
- Database production and maintenance, **421:35**
- Debridement, of hip for femoroacetabular impingement, **429:178**
- Delirium, postoperative, on outcome after hip fracture, **422:195**
- Delivery of depot antibiotics, in orthopaedic infections, alternative materials to acrylic bone cement for, **427:101**
- Demineralized cortical bone matrix, osteochondral defect repair by, **427S:62**
- Depot delivery, of drugs, current status of material used for, **427:72**
- Depot local anesthetic, in bone cement, **418:242**
- Designing repair and replacement strategies, functional tissue engineering parameters toward, **427S:190**
- Developmental and regenerative skeletogenesis, **427S:105**
- Diagnostic modalities, **427S:174** (breakout session group VI)
- Diaphyseal humerus, locking compression plates for osteoporotic nonunions of, **425:50**
- Differential diagnosis, of hip disease *versus* spine disease, **419:280**
- Digital divide phenomenon, in hand surgery outpatient clinic, **421:54**
- Digital imaging
living with, **421:25**
for orthopaedic surgeons, **421:10**
- Digital video, **420:17**
- Digitum Nodi, commentaries on history and cure of diseases, **427S:3** (classic article)
- Disc disorders, intervertebral disc cell culture for, **419:238**
- Diseases
commentaries on history and cure of (Digitum Nodi), **427S:3** (classic article)
early hip, arthroscopic intervention in, **429:157**
worldwide human, particle-induced periprosthetic osteolysis, conquest of, **429:39** (Presidential Guest Address)
- Dislocation(s)
acute knee, and their complications, **422:135**
after long-necked total hip arthroplasty, **422:164**
after total hip replacement using large diameter balls, prevention and treatment of, **429:108**
fractures, of olecranon and stable trochlear notch, **429:292**
and fractures, of spine complicating ankylosing spondylitis, **422:129**
hip, results of reoperation for, **429:94**
lumbosacral, traumatic, **419:91**
postoperative, after THA, constrained tripolar acetabular liner for treating intraoperative instability and, **429:117**
rate, mini-incision anterior approach, does not increase, **426:164**
of rotating platform after low contact stress total knee arthroplasty, **425:207**

- THA: optimal treatment for displaced femoral neck fractures in, **429:43**
 treatment of distal humerus fractures in, **425:55**
 vertebral collapse, **423:291**
- Disorders, spinal, in elderly, **425:110**
- Dissection, of complex genetic disease, **419:297**
- Distal femoral fractures, fixation of, **426:252**
- Distal femur fractures, in elderly, total knee arthroplasty for, **425:101**
- Distal humerus, fractures treatment in elderly, **425:55**
- Distal ingrowth components, **420:135**
- Distal radius fractures
 assessment of articular displacement of, **423:79**
 nonunions of, **419:51**
- Distal tibial metaphysics and plafond, infected fractures of, **427:57**
- Distal tibiofibular syndesmosis, radiographic measurement of, **423:227**
- Distraction osteogenesis (callotaxis)
 in aged rat by fibroblast growth factor, modulation of, **425:264** (Nicolas Andry Award)
 in bladder exstrophy, **418:231**
 for knee arthrodesis in infected tumor prostheses, **424:166**
 weightbearing effects on bone formation during, **419:251**
- Distraction(s)
 intraoperative measurement of, for ligament tensioning in total ankle arthroplasty, **424:111**
- Donor cell retention, preincubation, enhances, **420:276**
- Dorsal transscaphoid-transtriquetral perilunate dislocation, in pseudarthrosis of scaphoid, **426:135**
- Dorsal wrist ligament insertions, stabilize scapholunate interval, **425:152**
- Dose-responsiveness, of electrophysiologic change in acute carpal tunnel syndrome, **427:120**
- Drugs, depot delivery of, current status of material used for, **427:72**
- Dynamic MRI, VEGF expression in osteosarcoma with vascular permeability by, **426:32**
- Dysplasia epiphysealis hemimelica, early loss of hip containment, **427:213**
- E**
- Ectopic bone formation, effect of osteogenic protein-1 dosing regimen on, **423:264**
- Education
 Internet-based learning, **421:99**
 patient, through Internet, **421:50**
- Elbow(s)
 capsules, after trauma, myofibroblast numbers in, **419:189**
 mass, in 2-year-old, **418:272**
 new revision implant for, modeling and finite element analysis of, **420:292**
 soft tissue mass in 9-year-old boy, **427:258**
 souter arthroplasty for, with severe destruction, **421:126**
- Elderly
 clinical pathway for hip fractures in, **425:72**
 durability of cemented femoral stem in, **419:115**
